If more than one search is submitted, please prioritize searches in order of need.

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: Treatment of sleep disturbance
Inventors (please provide full names): Koch et al.

Earliest Priority Filing Date: 1/19/01

For Sequence Searches Only Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.

1) Please search claims 1 - 13

Voluntary Results Feedback Form

➤ I am an examiner in Workgroup: Example: 1610

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

AB The present invention is directed to a pharmaceutically acceptable taste masking liq. excipient base for administration of a relatively large amt. of unpleasant tasting medicines. More particularly, the enhanced sweetness and taste masking effect are produced by the addn. of sucralose to the excipient base with maintenance of a pH 2-5. The invention is further directed to medicinal compns. comprising such a liq. excipient base and unpleasant tasting medicines. Still further, the invention is directed to a method for taste masking unpleasant tasting medicines through their incorporation into the claimed liq. excipient bases. A

cough syrup ,contained guaifenesin 2.00, pseudoephedrine-HCl 0.60, dextromethorphan-HBr 0.20, PEG-1450 20.00, glycerin 6.00, high-fructose corn syrup (55%) 45.00, anhyd. citric acid 1.60, and 70% sorbitol 5.00, sodium citrate 0.20, sodium benzoate 0.30, Red No. 40 dye 0.05, golden punch flavor 0.10, sucralose 0.20, and water to 100.0%.

AB	Disclosed are compns. comprising ibuprofen (I) and diphenhydramine (II) and methods for their use in analgesia. When ibuprofen and diphenhydramine are within certain ratios, their pharmacol. effects are superadditive. ED50 of I and II.HCl decreased from 36.5 and 8.0 mg/kg, resp. to 2.4 mg/kg orally each, when, combined and none of the mice tested in acetylcholine bromide induced abdominal constriction assay showed writhing.

AB	Pharmaceutical compns. which can relieve the symptoms of overindulgence, such as headache and acid indigestion, comprise (1) acetaminophen or a nonsteroidal antiinflammatory drug and (2) histamine H1 or H2 receptor blocker, proton pump inhibitor, or a combination thereof. The compn. can be in the form of tablets, capsules, or liqs. Thus, a tablet contained acetaminophen 500, cimetidine 150 mg, and other auxiliary agents and coloring agents.				
ST	overeating symptom antiinflammatory antihistaminic tablet; acetaminophen cimetidine tablet overeating symptom				
IT	Headache (from overeating, treatment of, inflammation inhibitor-antihistaminic combinations for)				
IT	Inflammation inhibitors (mixts. with antihistaminics, headache and indigestion from overeating treatment with)				
IT	Antacids and Antiflatulents (mixts. with inflammation inhibitors, headache and indigestion from overeating treatment with)				
IT	Antihistaminics (H1, mixts. with inflammation inhibitors, headache and indigestion from overeating treatment with)				
IT	Antihistaminics (H2, mixts. with inflammation inhibitors, headache and indigestion from overeating treatment with)				
IT	Digestive tract (disease, indigestion, from overeating, treatment of, inflammation inhibitor-antihistaminic combinations for)				
IT	Appetite (disorder, hyperphagia, discomfort from, treatment of, inflammation inhibitor-antihistaminic combinations for)				
IT	Pharmaceutical dosage forms (liqs., oral, of anti-inflammatory and antihistaminic combinations, for treatment of headache and indigestion from overeating)				
IT	Pharmaceutical dosage forms (tablets, of anti-inflammatory and antihistaminic combinations, for treatment of headache and indigestion from overeating)				
IT	53-86-1D, mixts. with antihistaminics 58-73-1D, mixts. with anti-inflammatory agent 59-33-6D, Pyrillamine, mixts. with anti-inflammatory agent 60-87-7D, Promethazine, mixts. with anti-inflammatory agent 61-68-7D, mixts. with antihistaminics 68-88-2D, Hydroxyzine, mixts. with anti-inflammatory agent 79-09-4D,

 AB WO 200256877 A UPAB: 20021001
 NOVELTY - A composition comprises **ibuprofen** (I) and
diphenhydramine (II).

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for
 evaluating a compound or composition for the treatment of a
 pain-associated **sleep** disturbance in patients experiencing at
 least moderate or several levels of pain involving:

- (a) administering the compound or composition to the patient after
 oral surgery;
 - (b) sending the patient to bed earlier than his usual bedtime; and
 - (c) assessing the effectiveness of the compound or the composition.
- ACTIVITY - Analgesic; Sedative.

Patients suffering from pain associated **sleep** disturbances
 were administered **ibuprofen** (400 mg) and **diphenhydramine**
 (50 mg) in a single soft gelatin **capsule** before bedtime. The
 symptoms of their pain associated **sleep** disturbances improved.
 They slept for a longer duration and also fell asleep faster than
 expected. Thus the composition was useful for treating pain associated
sleep disturbances.

MECHANISM OF ACTION - None given.

USE - For treating pain-associated **sleep** disturbances
 affecting **sleep** duration (claimed) (preferably shortened
sleep duration). The pain-associated **sleep** disturbances
 include difficulties in falling asleep and staying asleep.

ADVANTAGE - The composition does not have negative interactions
 between (I) and (II) during formulation or when placed on shelves. The
 composition is stable chemically and physically. The combination of (I)
 and (II) yields a somnolent effect greater than that of (II) alone. (I)
 Alone is effective for only 4-6 hours while the composition is effective
 for longer periods of time.

MC CPI: B10-B03B; B10-C02; B10-C04C; B11-C08; B12-K04; **B12-M11B;**
B12-M11C; B12-M11K; B14-C01; B14-J01B1

TECH UPTX: 20021001

TECHNOLOGY FOCUS - PHARMACEUTICALS - Preferred Composition: The
 composition comprises (I) (50-800, preferably 200 mg) and (II) in the form
 of **diphenhydramine HCl** (12.5-50, preferably 25 mg) or
diphenhydramine citrate (19-38, preferably 38 mg).
 Preferred Method: The step (c) is performed by evaluating at least one of
sleep latency, sum of pain relief and pain intensity differences
 over 0-3 hours (SPRID3), cumulative percent asleep at 60 minutes, ease of
 falling asleep, duration of **sleep**, global evaluation of
sleep, median time to rescue medication, percent of patients
 requiring rescue medication, global assessment as a pain reliever, global

assessment as a **sleep** acid or pain relief intensity difference (PRID) 90 or 60 minutes (preferably **sleep** latency, **sleep** duration and SPRID3). The patient is sent to bed 1-6 (preferably at least 1, 3 or upto 6) hours earlier than his usual bedtime.

ABEX UPTX: 20021001

ADMINISTRATION - Administration of (I) is 50-800 (preferably 200) mg. The dosage for **diphenhydramine HCl** is 12.5-50 (preferably 25) mg and that for **diphenhydramine citrate** is 19-38 (preferably 38) mg. The composition is a bilayer **tablet** or **caplet** or a soft gelatin **capsule** containing **polyethylene glycol** and is administered in one or two doses concomitantly. The second dose is optionally administered (all claimed). The composition is administered from 90 minutes before bedtime to immediately before bedtime (preferably 45-15 minutes especially 30 minutes before bedtime).

EXAMPLE - **Diphenhydramine hydrochloride** (40.050 kg) was dissolved in water (46.138 kg) and **polyethylene glycol** (molecular weight 600) (200.250 kg) was added to it. **Polyethylene glycol** (molecular weight 600) (326.808 kg) was also added to **ibuprofen** (320.400 kg) and mixed. Potassium hydroxide (41.011 kg) was dissolved in water (34.603 kg) and added to the **ibuprofen** dispersion and mixed under vacuum. The temperature was maintained at 75-125 degrees F. The **diphenhydramine hydrochloride** solution was added to the **ibuprofen** /potassium hydroxide/**polyethylene glycol** solution and mixed under vacuum. The solution was deaerated under vacuum for at least 15 minutes and pressurized. The solution was **encapsulated** with in a gelatin shell and processed to completion. The **capsule** had the following composition (mg): **ibuprofen** (200), **diphenhydramine HCl** (25), DandC Red No. 33 (RTM) (0.0113), FDandC Blue No.1 (RTM) (0.0170), **polyethylene glycol** (molecular weight 600) (329), potassium hydroxide (25.6), purified water (50.4), ANDRISORB 85/70 (RTM) (93.4) and gelatin (164).

NOVELTY - Stable liquid softgel fill formulations comprising high concentrations of **ibuprofen** in free form, **polyethylene glycol** and polyvinylpyrrolidone, and soft gelatin **capsules** containing them, are new.
DETAILED DESCRIPTION - A liquid softgel fill formulation comprises (as wt.%):
(a) greater than 30% **ibuprofen** (I) in free acid form in solution;
(b) 30-60% **polyethylene glycol** (PEG);
(c) 10-30% polyvinylpyrrolidone (PVP); and
(d) optionally 1-10% surfactant to increase bioavailability of (I).
INDEPENDENT CLAIMS are included for softgel **capsules** comprising a sheath enclosing a liquid fill as described above.
USE - For administration of **ibuprofen**.
ADVANTAGE - Use of a large amount of PVP permits a reduction in the amount of **PEG** required, reducing the esterification reaction between (I) and **PEG**.

B12-M11C
TECH UPTX: 20010603
TECHNOLOGY FOCUS - PHARMACEUTICALS - Preferred Composition: The composition preferably comprises at least 35 wt.% (I); 30-50% **PEG** having average molecular weight (MW) 200-1,000; and 15-30% PVP having MW 2,000-54,000. The surfactant is e.g. an ester of d-alpha-tocopheryl, a **polyoxyethylene** castor oil derivative, or polyglycolized glyceride.
The composition may further comprise up to 6% of a nasal decongestant (e.g. pseudoephedrine hydrochloride), or up to 10% of an antihistaminic (e.g. **diphenhydramine hydrochloride**).
The sheath of the softgel **capsule** comprises 45-75% gelatin; 20-40% plasticizer (e.g. sorbitol, sorbitol special, and/or maltitol); and 5-15% water. The total weight of the **capsule** fill is less than 600 mg, and the weight of (I) is at least 200 mg.
ABEX UPTX: 20010603
EXAMPLE - A fill formulation was prepared comprising (as wt.%): (I) 35%; **PEG** 600 37%; Kollidon17 PF (RTM: PVP, MW 10,000) 22%; and Vitamin E TPGS 6%.

A cold remedy soft **capsule** comprises a soln. of **ibuprofen** and one or more second drugs from histamine antagonist, antitussive agent, expectorant, sympathetic nerve stimulant and central stimulant in a base contg. a surfactant from **polyoxyethylene** (POE) sorbitan fatty acid ester, POE hardened castor oil and polyglycerol fatty acid ester and water, and no hydroxide ions.

The central stimulant is anhydrous caffeine, caffeine or sodium benzoate caffeine.

The surfactant has HLB of 13-18.

POE (20) sorbitan monooleate (1030.5g) at about 60 deg.C was added with **ibuprofen** (225g), **diphenhydramine hydrochloride** (37.5g), dihydrocodeine phosphate (12b), noscapine hydrochloride (24mg), dl-methylephedrine hydrochloride (30g), guaifenesin (125g) and anhydrous caffeine (15g). The mixt. was vigorously stirred using a homogenizer, cooled to about 40 deg.C, added with purified water (106g), deaerated under vacuum and filtered through a 100 mesh. The filtrate (each 535mg) was filled in a gelatin film [comprising gelatin (100g) and glycerol (30g)] to give 3,000 soft **capsules**.

ADVANTAGE - Absorption of the drugs is excellent, **ibuprofen** is stable in the **capsule**, and the **capsule** need not be measured and is handy to carry.
